Veles High School students visit the American Corner Skopje

September 24, 2009

Around 35 students from the Veles high school "Jovce Teslickov" visited the American Corner Skopje.

During this Inreach, the AC Staff talked about the services the American Corner has to offer: upcoming and past presentations and the resources available, but also the educational advising offered as part of Education USA, and the services of the testing center.

The students were invited to participate in the presentations next week, like the "Bilingual Education" and the "YES Scholarship program" – for which they were all encouraged to apply.

All of the students received brochures and leaflets and were given Membership Applications.

The American Corner also received an invitation to do a presentation at their school, which we definitely plan to honor.
