

INREACH: visit from high school students from Algoritam School

September 29, 2009

As part of our INREACH presentation, on September 29 we hosted 13 students from Algoritam high school, who came for an informational visit.

As usual, RCS Nevenka Stefanovska first did a short presentation with what are the benefits of becoming a member and what the corner does. She also explained about our web presence; the blog and on facebook, and encouraged everyone to participate in the "Democracy video challenge" also posted on the AC facebook page.

EA Gordana Mircic then explained the services the Educational center has to offer. She

especially invited everyone to apply for the YES Scholarship program and attend the presentation scheduled for Thursday, October 1st.

At the end, we held "US The Capitals" quiz, prepared by the AC Staff. The students truly enjoyed competing for the correct answer and had fun guessing when they did not know the answer.
